CLASS OF '74

Indiana University School
of Medicine

Indianapolis, Indiana

Volume VII

INDIANA UNIVERSITY SCHOOL OF MEDICINE
1100 WEST MICHIGAN STREET • INDIANAPOLIS, INDIANA 46202

Medical Class of 1974

Your progress through four intensive and challenging years at the Indiana University School of Medicine has been marked by continued achievement and by parallel progress for your School. You have successfully filled key roles in the development of the innovative Statewide System of Medical Education, for which Indiana has gained national attention and the compliment of imitation.

In the hospitals, clinics, laboratories, and classrooms, you also have completed a great deal of hard work on the long road toward the M.D. You have earned commendation for these efforts and accomplishments, and I am pleased to have the opportunity to extend congratulations to you in this your Senior Class Yearbook.

As you plan and look ahead to your careers as physicians, it is appropriate to note that we live in a time of transition. Social, economic and other conditions are changing, as are the dimensions of responsibilities for providing health care. We hope and expect that the professional standards and aspirations that your faculty have transmitted to you will equip you to cope with those changes. As you have grown in the experience and grasp of the science and art of medicine, you carry obligations to continue growing, as productive, dedicated, and effective practitioners.

You have witnessed considerable institutional growth at your School of Medicine, the Medical Center, and the new urban campus that is developing nearby. Your School has grown in enrollment, in curricular offerings, in new and expanded facilities, and in geographic span of programs. You have helped to make these advancements possible, and we are grateful for your contribution.

We are justifiably proud of your excellent performance so far, and we look forward to taking future pride in your performance as alumni. Best wishes to all of you.

Sincerely,

Sheldon W. Davis Jr.

CLASS OF 1974
 INDIANA UNIVERSITY
 SCHOOL OF MEDICINE
 1100 WEST MICHIGAN STREET
 INDIANAPOLIS, INDIANA

SATURDAY, MAY 18, 1974, 1:00 P.M.

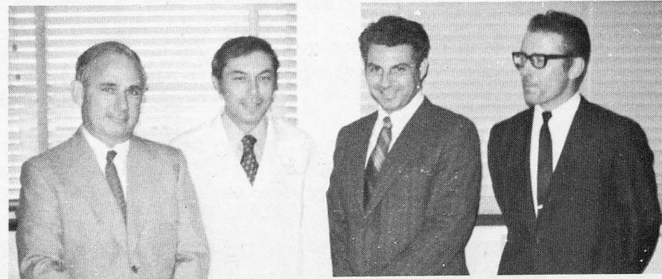

ID: The pt. is approx. 20 yr. old. He is an unemployed, over-worked married or unmarried person with 0 to 6 children who live in an apt. (or ? dorm, condominium or house ?). The pt. is referred for dx. & possible definitive therapy from St. Somebody's Hospital, in Somewhere, Ind., by Good O. (Ole) Doc. CC: Pt. c/o "sore eyes", pain in L. hip, pain in neck, general fatigue, & "jumping" in his chest. PI: Approx. 4 1/2 yr. ago the pt. was accosted by a registered letter which committed him to allegedly something he desired. Pt. experienced approx. 6 mon. elation which ended in an acute financial discharge. Following the acute financial bleed there were bouts of intermittent dry hands, occ. periods of extra-corporeal foul odors, rat bites (unconfirmed), & a sx. consistent with but not necessarily dx. of claudication in the region of the upper eyelids. All of the above noted sx. ended abruptly 3 1/2 yr. ago with exception of presumed eyelid claudication and were replaced with occ. flea bites,

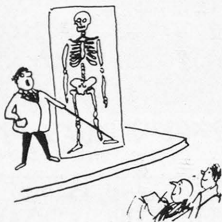

The senders of the registered letter, the ADMINISTRATION: Glenn W. Irwin (chancellor & former dean), Jay M. Smith, Ward W. Moore, H. Ronald Gines, James E. Carter, Steven C. Beering, & George T. Lukemeyer (acting dean).

A picky course, but a stiff foundation was provided by Ralph A. Jersild, Lois C. Perkins, Carl R. Morgan, Mohammed Ishaq, John F. Schmedtje & Robert H. Shellhamer.

David M. Gibson (chrnmn.), Ronald R. Beck (physiology), David W. Allmann, Larry K. Steinrauf & others tempted academic catabolism in those with enzyme deficiencies.

"You will have to learn many tedious things, . . . which you will forget the moment you have passed your final examination, but in anatomy it is better to have learned and lost than to have never learned at all."

W. Somerset Maugham

(CIRCLE ONE)

sporadic EtOH intoxication & acute fear of intracorporeal neurological symptomatology. As abrupt as their onset, ALL sx's. digressed with no relapses for 3 mon.

2 yr. 9 mon. ago pt. recalls a recurrence of eyelid claudication & occ. flea bites following a 2nd acute financial DC. Pt. also noted frequent exposure to microorganisms, some of which

The science of function was conveyed in part by Julius Friedman, Sidney Ochs, Ewald Selkurt (chrnm.), Kalman Greenspan & Thomas Lloyd.

To understand infection, one must know the infector. Among those infecting the infectees with their knowledge were Sherman Minton, Donald Niederpruem, & William Summers.

he could not identify, & an instrumental financial DC x5 mon. Pt. claims no relief from above sx. except with periods of absolute rest. He does recall a mild diminution of sx's. with a new analgesic-anesthetic drug whose generic name is "notes classis".

Pt. had an uneventful recovery & maintained this remission for 5 mon. except for paroxysms (x 1/wk) of SOB post prolonged questioning, with subsequent claudication of the writing digits lasting 10 to 15 pages.

"An expert is a man who tells you a simple thing in a confused way in such a fashion as to make you think the confusion is your own fault."

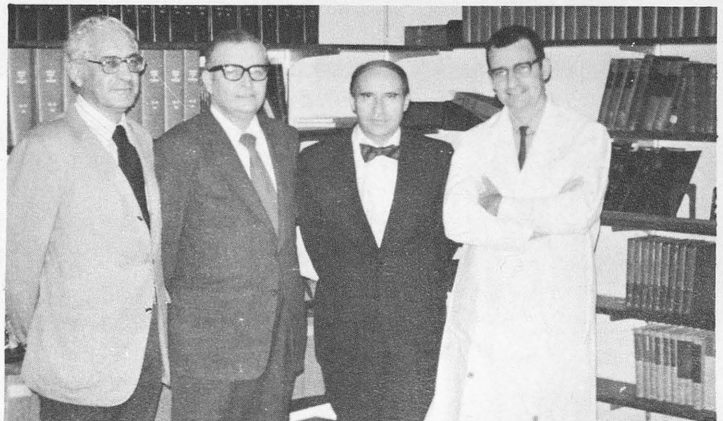

William B. Castle

"One thing seems certain - if we taught and examined less, our students would learn more. If we add anything further to the medical curriculum let it be spare time."

C.C. Okell

"Those who are enamoured of practice without science are like a pilot who goes into a ship without rudder or compass and never has any certainty where he is going. Practice should always be based upon a sound knowledge of theory."

Leonardo da Vinci

Habit forming but not sugar coated were the lectures of Robert B. Forney, James E. Ashmore (chrnm.), George Weber & Raymond R. Paradise.

HISTORY-PHYSICAL-PROGRESS-OTHER _____

(CIRCLE ONE)

Approx. 2 yr. ago pt. recalls acute onset of Sob, total body claudication & weakness, insomnia progressing to complete fatigue, & a chronic infection with what he calls "Gram negative Scut". These progressed to life threatening levels over a period of 11 mon. with only a 1 short mon. remission. However, after 12 mon., all sx's. digressed except for an acute two day mental discharge apparently unrelated to the prior year.

During the last 11 mon. the pt. has noted varying degrees of manic-depressive moods with paroxysms of eyelid claudication & only occ. bouts of fatigue; however, all to a degree far less than previous. The only new sx's. were two addn'l acute intoxications recalled in Dec. '73 & Apr. '74. The April inebriation coexisted with an acute & severe mental "high".

PMH:

CHD: UCHD save for an acute 2 mon. ped's attack during PI.

AD: too busy to be sick.

Immun: up to date except for those to Registered letteritis.

Prev. Hosp.: none except for last 2 yr. of PI.

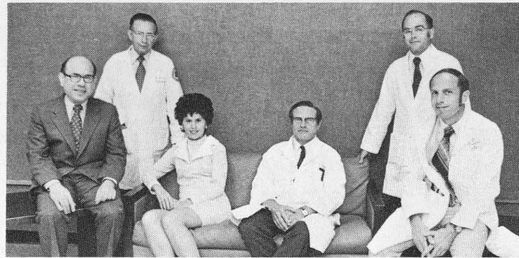

Prev. Surg.: multiple incisions & suturing during at least 3 mon. of PI.

Allergies: work, FLEX, boards, minitests, MCGH cuisine, & the VA's ethereal environment.

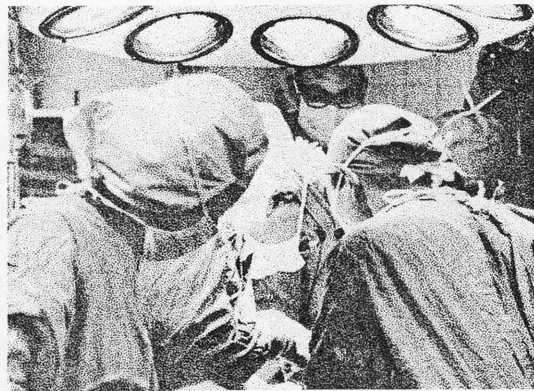

Meds: previously ingested copious amounts of "notes classis" & free MVI's.

Habits: smokes, inadequate EtOH intake to suppress PI, drugs denied (?), & illusion (delusion ?) to excessive sexual activity PRN.

FH: Parenteral support (physical, financial, and/or spiritual) with possible similar hx. of PI somewhere else in FH.

Helping to recall the younger years, teaching its diseases and those which were fortunately avoided, were Morris Green (chairman), John Heubi, Patricia Keener, Ira Brandt, James Northway & Roger Hurwitz.

"Surgery is the ready motion of steady and experienced hands." (Galen) Helping to train the ten thumbs we possess on our two left feet were John L. Glover (Dir., MCGH), Robert E. Lempke (Dir., VA), John E. Jesseph (chairman), Harold King (Dir., Cardiovascular), Jay L. Grosfeld (Dir., Pediatric), Robert L. Campbell (Dir., Neurosurgery) & James E. Bennett (Dir., Plastic).

Nose: off-center, no fx.
 Mouth: coffee burns, WNL.
 Throat: clear T/A done.
 Neck: midline trach.,
 hypertrophied dorsal
 musculature, no nodes.
 Chest: NBS bilat., clear.
 Cardiovascular: sl.
 tachy. with reg. rhy-
 thm; no M, S, or G;
 no thrills or lifts.
 Pulses good, equal,
 no bruits noted. Sl.
 varicosities with
 no pedal edema.

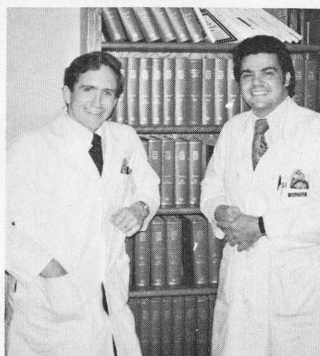

Helping teach an understanding of the patient's as well as the physician's mind were Richard French, Jr., Nancy Roeske, John Nurnberger (chrmn.) & James Simmons.

Abdomen: WNL except for midepigastria tenderness to palp.
 Genitourinary: ext. genit. WNL.
 Pelvic: specula too cold.
 Rectal: up his, WNL.
 Back & Extremities:
 bilat deltoid &
 dors. cerv. m.
 enlargement;
 chronic shoe
 leather wearing.
 Neurological: gross-
 ly intact motor &
 sensory function
 with no deficits.
 Skin: clear with no
 discoloration or
 lesions.

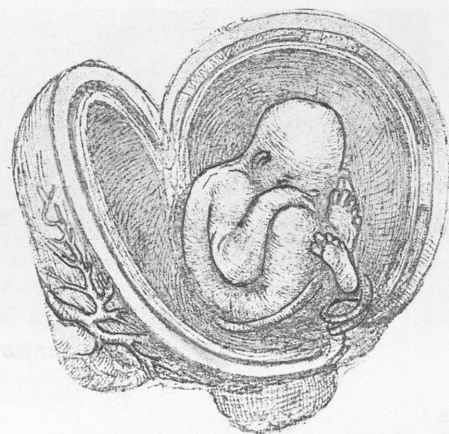

Only two of the many who helped teach the art of female speculation, Joseph Thompson & Arthur Baptisti (deceased).

Make no bones with these two physicians unless you want them total hip-erized or suspended in Buck's traction, Merrill A. Ritter & Guy P. DeRosa. (James B. Wray (chrmn.) deceased)

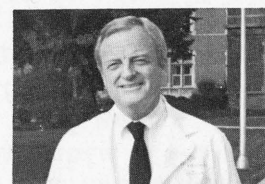

"In teaching the medical student the primary requisite is to keep him awake."

Chevalier Jackson

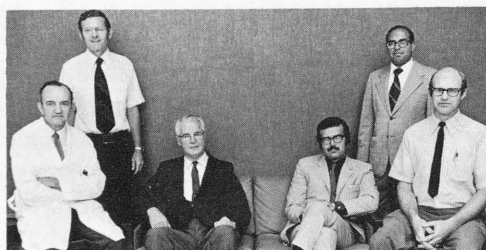

"Your order shall commence with the formation of the child in the womb, saying which part of it is formed first and so on in succession, placing its parts according to the times of pregnancy until the birth. . ."

Leonardo da Vinci

An ectopic presentation of Charles A. Hunter, Jr. (chrmn.).

A complex maze of pathways proved easier to traverse following exposure to Robert Campbell (chrmn, neurosurg.), William DeMeyer, Alexander Ross, Mark L. Dyken (chrmn.), Omkar Markand & Charles Spurgeon.

"Hackney for acne, Norins for corns". In their own words, these physicians are "fore skin", Arthur L. Norins, Victor C. Hackney (chairman) and Warren W. Epinete.

HISTORY-PHYSICAL-PROGRESS-OTHER

(CIRCLE ONE)

Impression:

- a. status post "Registered letteritis".
- b. "Minitestitis" x 2, by hx.
- c. chronic progressive pain in post. L. hip 2° to "deflation walleti" following several acute financial discharges.
- d. "flea-bitis", by hx.
- e. levator palpebrae hypertrophy with claudication bilat. 2° to chronic ocular exploitation of the written word.
- f. chronic cervical myalgia 2° to otic lectural stimulation.
- g. "Sophomoritis", by hx.
- h. "nares disproportia" 2° to falling texts qHS.
- i. SOB with "digiti crampus" 2° to frequent administration of H & P's.
- j. chronic EtOH intoxication x 4 yr. (at least) but insufficient to promote a diuresis of the present illness.
- k. multiple cranial academic attacks.
- l. general fatigue 2° to "junior-yearitis" and uncompensated relative hypothyroidism.
- m. "Gram negative Scut" infection x 11 mon., by hx.
- n. mild varicosities 2° to "operation longus" and "standing ward roundus".
- o. chronic gastroenteritis 2° to Botulee botulii (strain: hospitali cafeteria).
- p. mental wasting 2° to acute, overwhelming "boarditis" x 2.
- q. palpitations and tachycardia of eminent graduation.
- r. foreseeable acute FLEXion in next month or so.

Summary:

In summary, this pt. has a case of chronic "medicaloschoolitis" of four (4) years duration brought-on by an immunological deficiency to Registered letteritis.

Recommendations:

- a. banquet and merriment, stat.
- b. EtOH, PRN.
- c. one dose of "Graduation Medicali" in approx. 18 hrs.
- d. rest, ad infinitum.
- e. sexual enhancement, PRN.
- f. RTC 5 yr. for "Reunion d' Class" therapy.

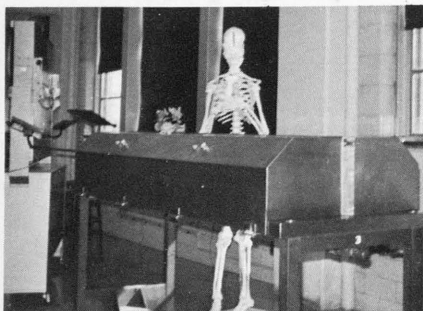

STATEMENT OF HOSPITAL RELEASE - INDIANA UNIVERSITY MEDICAL CENTER

This pt. is hereby released to himself and the world with the above recommendations with wishes for the best of luck and future success.

S. N. Tern, MD

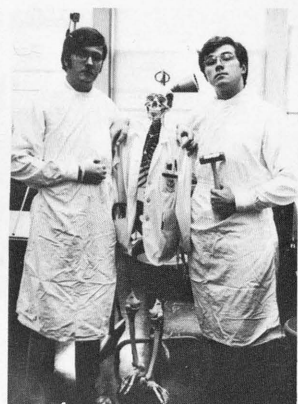

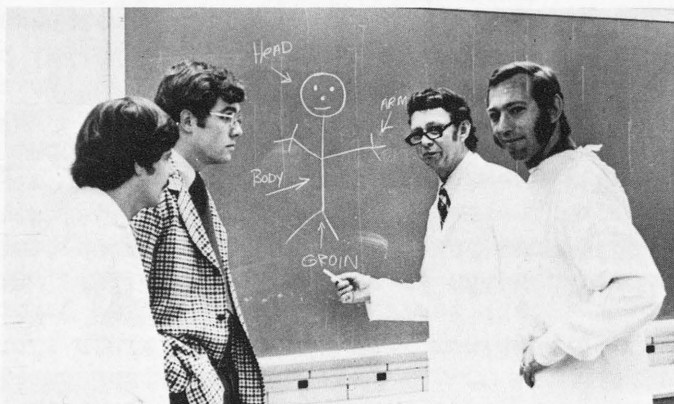

Basic Science

Freshman Year

"Medical students . . . naturally have faith in their instructors, turning to them for truth, and taking what they may choose to give them; babes in knowledge, not yet able to tell the breast from the bottle, pumping away for the milk of truth at all that offers, were it nothing better than a Professor's shrivelled forefinger."

Oliver Wendell Holmes

"Undoubtedly the (medical) student tries to learn too much, and we teachers try to teach him too much - neither, perhaps, with great success. The existing evils result from neglect on the part of the teacher, student and examiner of the great fundamental principle laid down by Plato - that education is a lifelong process, in which the student can only make a beginning during his college course. The system under which we work asks too much of the student in a limited time. To cover the vast field of medicine in four years is an impossible task. We can only instill principles, put the student in the right path, give him methods, teach him how to study, and early to discern between essentials and non-essentials. Perfect happiness for student and teacher will come with the abolition of examinations, which are stumbling blocks and rocks of offence in the pathway of the true student."

Sir William Osler

Illegitimi

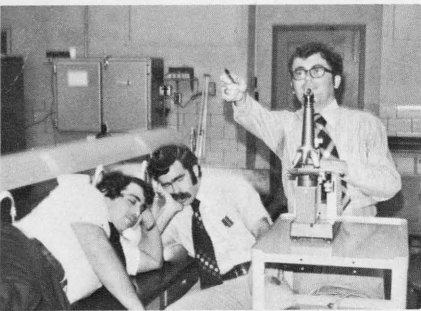

non

Carborundum

"Don't let the bastard wear you down."

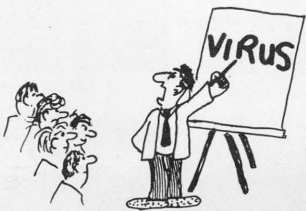

Sophomore Year

Note the fatty metamorphosis.

The girls who kept things straight by day take a pause from their writers of type: Pauline Mayfield, Mary Beth Locke, Lisa Hayes, Loraine Thomas, Barbara Carter, Nancy Thompson, Ann Gaughan & Myrna Carter.

"This is the Latin term you'll use when you mean 'Your guess is as good as mine'."

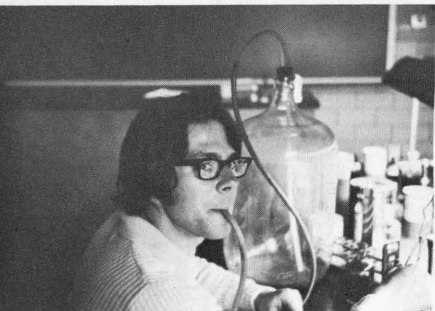

"Genius is one percent inspiration and ninety-nine percent perspiration."
Thomas A. Edison

POST - EXAM DISCUSSION
Frosh: "but Doctor _____, why did I fail the exam?"
Doctor: "I know that you believe you understand what you think I said, but I am sure you realize that what you heard is not what I meant."

"but it looked like liver"

On a locker door in ye olde locker room: "Never in the intercourse of human events have so many been fucked over by so few." (remember the class??)

Jerry takes the tube in micro.

BASIC SCIENCE GRADING GUIDE

	A	B	C	D	F
Quality:	leaps tall buildings in single bound	must take running start to leap over tall buildings	can only leap over a shed	crashes into buildings when trying to jump them	can't recognize buildings or jump
Timeliness:	faster than a speeding bullet	fast as a speeding bullet	not quite as fast	would you believe a slow bullet?	wounds self with bullets while trying to shoot gun
Initiative:	stronger than a locomotive	stronger than a bull elephant	stronger than a bull	shoots the bull	smells like a bull
Adaptability:	walks on water consistently	walks on water in emergencies	washes ¹ with water	drinks ² water	passes water in emergencies ³
Communication:	talks with God	talks with Lisa ⁴	talks to himself ⁵	argues with himself ⁶	loses those arguments

- 1: automatic A in Public Health & Preventive Medicine
- 2: automatic A in Renal Medicine
- 3: wins home dialysis machine & autographed cigar
- 4: automatic A in Dr. Tyler's course
- 5: automatic C in Psychiatry & automatic A in Child Guidance
- 6: automatic A in Psychiatry

"One of the chief defects in our plan of education in this country is that we give too much attention to developing the memory and too little to developing the mind; we lay too much stress on acquiring knowledge and too little on the wise application of knowledge."
William J. Mayo

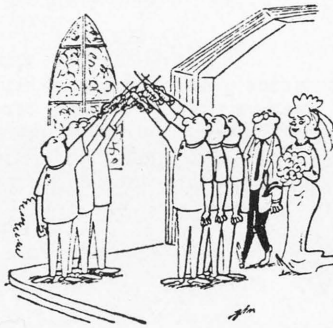

"Have you noticed, when they are strong in hearts, they casually mention DeBaeyer or Shumacker?"

Introduction to Medicine

Sophomore Year — Second Semester

"One of the unexpected and disturbing results of the development of increasingly precise and useful diagnostic measures in the laboratory and xray departments is a significant and often alarming decrease in emphasis on the training of the medical student to perform with excellence the average comprehensive physical examination."

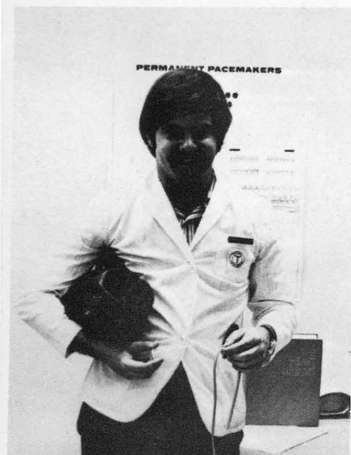

David Seegal

Some of us chose a harder course than others.

"It is extremely difficult for a physician who puts too much trust in what he reads to form a proper decision from what he sees."

Andrew Boorde

"The examining physician often hesitates to make the necessary examination because it involves soiling the finger."

William J. Mayo

A PHYSICAL DIAGNOSIS LESSON Dr. Daly, do you have an appointment?

"Though we name the things we know, we do not necessarily know them because we name them."

Homer W. Smith

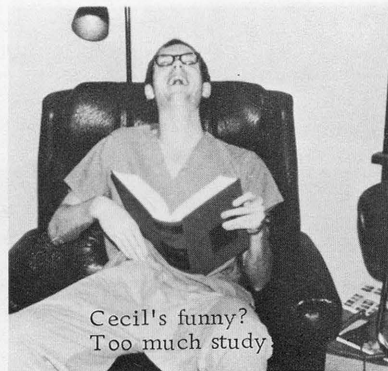

Putting It All Together

"The most essential part of a student's instruction is obtained, as I believe, not in the lecture room, but as the bedside. Nothing seen there is lost; the rhythms of disease are learned by frequent repetition; its unforeseen occurrences stamp themselves indelibly in the memory." Oliver Wendell Holmes

Study and Booze

What a Med Student Do's

Cecil's funny?
Too much study.

"The natural man has only two primal passions, to get and to beget."
Sir William Osler

The Bellevue Ball

Some of us had wives for dummies; others, dummies for wives.

Anyone who maintains calm in the midst of medical school's confusion simply does not understand the situation.

"Thus I saw that most men only care for science so far as they get a living by it, and that they worship even error when it affords them a subsistence."

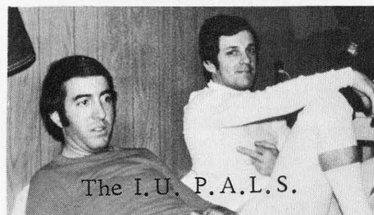

Johann Wolfgang von Goethe

The Skinning of Tricky Dick

The C.A.C.O.T.D.

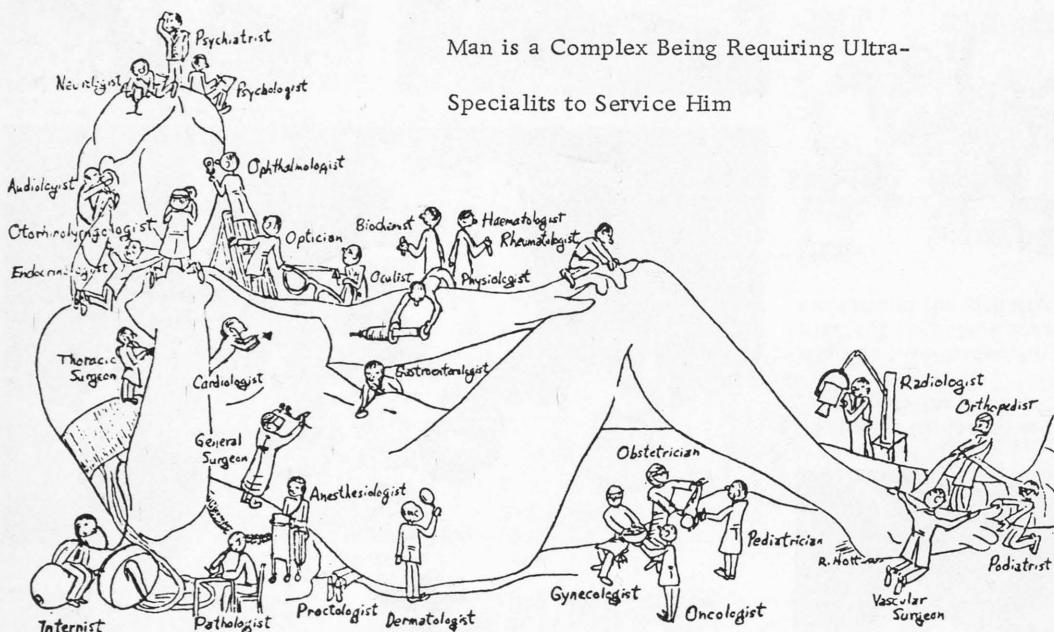

The I.U. P.A.L.S.

The First H&P: "According to your symptoms, you've been dead for 4 hours."

Clinical Science

Junior and Senior Years

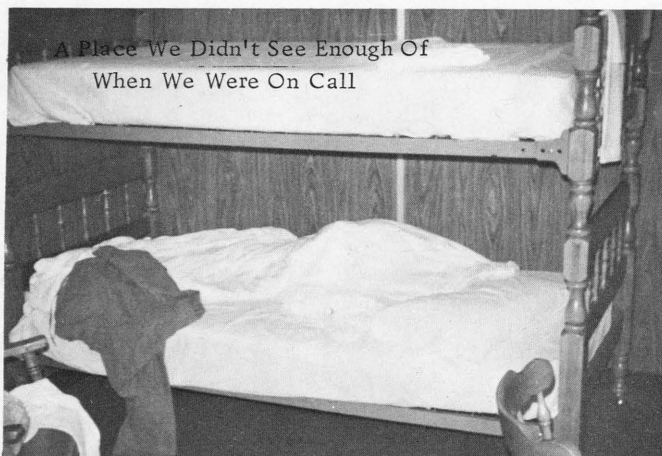

Man is a Complex Being Requiring Ultra-Specialists to Service Him

"Medical practice is not knitting and weaving and the labor of the hands, but it must be inspired with soul and be filled with understanding and equipped with the gift of keen observation; these together with accurate scientific knowledge are the indispensable requisites for proficient medical practice."

Maimonides
(Moses ben Maimo)

One of the first things you learn on the wards . . .

"You know that medicines when well used restore health to the sick: they will be well used when the doctor together with his understanding of their nature shall understand also what man is, what life is, and what constitution and health are. Know these well and you will know their opposites; and when this is the case you will know well how to devise a remedy."

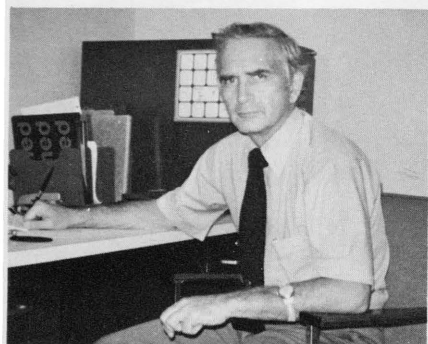

Leonardo da Vinci

"It was so good of you to come, Nurse!"

We hoped for topless nurses, but had to settle for bottomless patients.

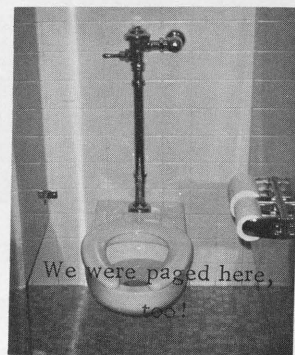

Raleigh E. Lingeman (chrmn. ENT)

James B. Wray (chrmn. Orthopaedics, deceased)

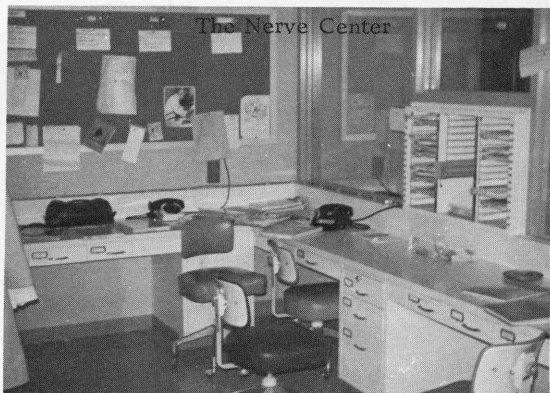

"The practice of medicine is an art, not a trade; a calling, not a business; a calling in which your heart will be exercised equally with your head. Often the best part of your work will have nothing to do with potions and powders, but with the exercise of an influence of the strong upon the weak, of the righteous upon the wicked, of the wise upon the foolish."

Sir William Osler

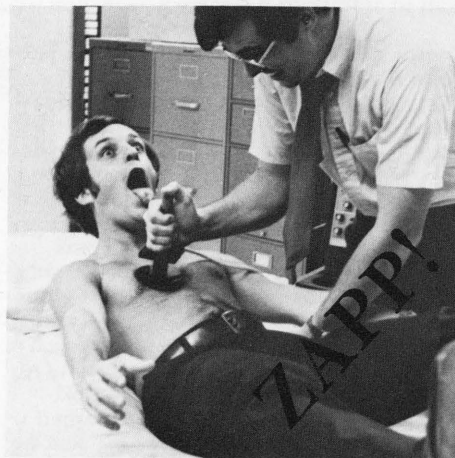

"But Dr. Ritter, ours is the only O.R. hood with a personality."

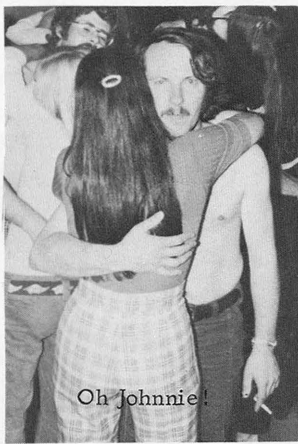

"He's not responding well to anesthesia."

"Tim, that's not ovary, you're on GI!"

The End Is Near!

Oh Johnnie!

She wouldn't cooperate (?).

So now we're finished, school is over, it's done.
A pause to reflect the battles, some lost, some won.

Memories are endless of time spent as clerk,
Those long days and nights of fond old scut work.
There were many classes and labs to get past;
Some were a challenge, some a pain in the ass.
There were workups on medicine, workbook on surgery,

Diseases to learn, operations to see.
And who can forget the q o night call,
The General ER, of hell what a ball.
And some of the subspc's - two weeks at a shot
But a lot of the biblio was all that we got.
Remember that medicine resident who though he invented scut

And that staff man in surgery, oh what a pain in the butt.

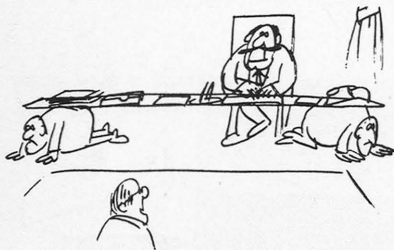

So now dear friends we're almost in heaven.
We've been going now for eight years or maybe its seven.

It's a long road to go, a tough row to hoe,
But we're ready for challenge wherever we go.
And so as we scatter and go our own ways
There really remains only one thing to say:
No more silly questions, no short white coats;
We're interns now, not anyone's goat.

Ray H. Randolph

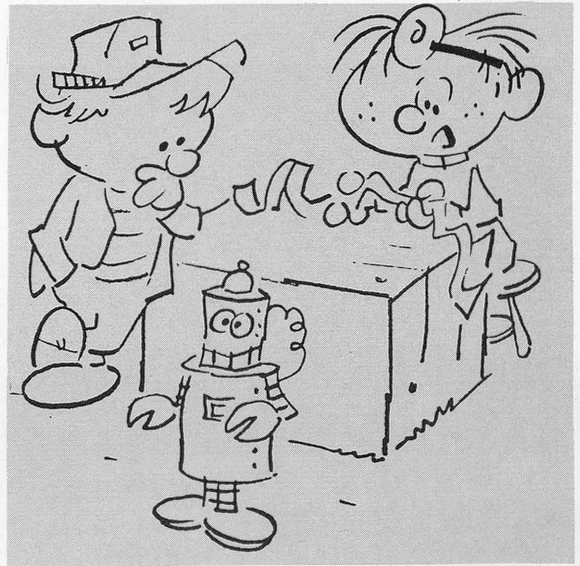

You LOST the blood?

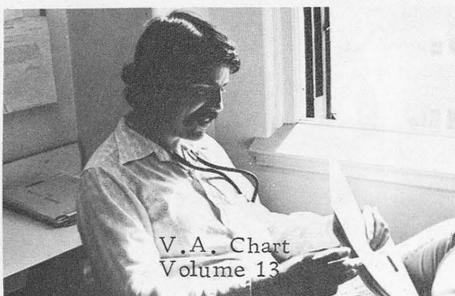

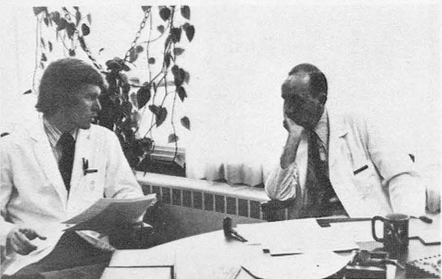

"When do you expect your new desk, Dr. Jesseph? We're running short of interns."

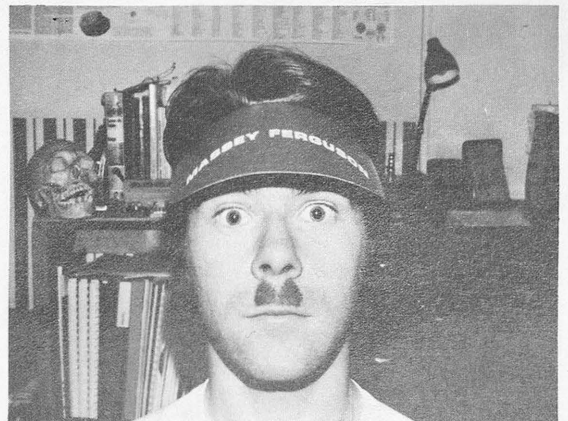

Edward Tyler (former Dean of Students)

"According to his EKG, he needs new batteries."

MED SCHOOL AIN'T EASY

by Gerold T. Butler

Four year med school lyin' ahead,
Wondrin' how I'm gonna get all those facts in my head.
Drinkin', thinkin', up late at night,
Got a biochem test tomorrow, hope it turns out all right.

Chorus: But med school ain't easy.
It's nasty and it's boring',
It's four years hard workin'
And God I've only begun.

Campbell, Butler, Bubb and Chuck Buck
Caplin's the fifth one, we ain't worth a
Split heads, steel beds, what a strange sight
Workin' on our cadaver on into the night

Chorus: But med school aint' easy.
It's nasty and it's borin',
It's four years hard workin'
And God I've only begun.

Flexors, extesors, learn all their names,
After four hours they all sound the same.
Inspectin', dissectin', that ain't the issue
Listenin' to Doc Katzberg discussin' those tis-sues.

Chorus: But med school ain't easy.
It's nasty and it's borin'
It's four years hard workin'
And God I've only begun.

White coat, black bag, really first class
Walking around in PD, feel like an ass.
Lectures, work-ups, long H & P's
Tryin' to learn somethin' 'bout health and disease.

Chorus: But med school ain't easy.
It's nasty and it's borin'
It's four years hard workin'
And God I've only begun.

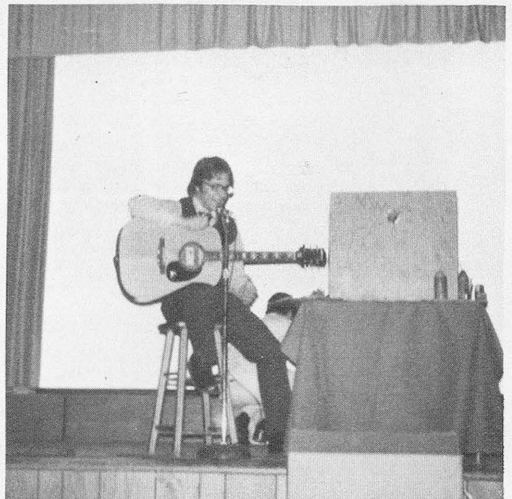

Surgery, medicine, three long months each,
Trying to catch babies and learn how to stitch.
O.B., night calls, oh what a scene,
Stayin' up with a pit drip is sure really keen.

Chorus: But med school ain't easy.
It's nasty and it's borin',
It's four years hard workin'
And God I'm almost done

Coastin', toastin' at social affairs,
Big intern parties, I've even slicked down ma hair.
Selective electives they all are all right,
Sure is a pleasure to go home at night.

Chorus: But med school ain't easy.
It's hard, it's drudgery,
It's four years of hard workin',
But it's great when you come to the end.

Amen.

A lone balladeer sang our tale
o'woe.
Oh the many year, but still did
we go.
And when now he sang,
Rapidly, all did we go . . .

The day ended with urgency, frequency,
coffee and ASA.

We have walked the rocky road and are now Doctors of Medicine. For a moment let us reflect on our future. Moses ben Maimon did such in the twelfth century and his words are most appropriate yet today.

Thou has endowed man with the wisdom to relieve the suffering of his brother, to recognize his disorders, to extract the healing substances, to discover their powers and to prepare and to apply them to suit every ill.

Imbue my soul with gentleness and calmness when older colleagues, proud of their age, wish to displace me or to scorn me or disdainfully to teach me. May even this be of advantage to me, for they know many things of which I am ignorant.

Grant me an opportunity to improve and extend my training, since there is no limit to knowledge. Help me to correct and supplement my educational defects as the scope of science and its horizon widen day by day. Give me the courage to realize my daily mistakes so that tomorrow I shall be able to see and understand in a better light what I could not comprehend in the dim light of yesterday. Bless me with a spirit of devotion and self-sacrifice so that I can treat and heal thy suffering servants and prevent disease and preserve health to the best of my ability and knowledge.

Let me see in the sufferer the man alone . . .

Grant that my patients have confidence in me and my art and follow my directions and counsel.

Moses ben Maimon
(Maimonides)

“It’s good to be a seeker,
but sooner or later
you have to be a finder.
And then it is well
to give what you have found,
a gift into the world
for whoever will accept it.”
